

Essential Traits of **Bentang Bahari**

- 1 Full DP Capability**
Our vessel's full DP-2 system ensures precise cable laying operations, eliminating reliance on external factors and guaranteeing project success.
- 2 Internationally Certified**
Bentang Bahari is designed with high standards of safety and efficiency. Certified by an international organization called **Det Norske Veritas (DNV)**, this ensures that Bentang Bahari maintains the highest quality, undergo a rigorous testing process, and consistently perform well in all conditions.

- 3 High Technology Equipment**
Bentang Bahari is equipped with the latest high-tech cable laying equipment such as ROV CT-2, Plough, A-Frame, Linear Cable Engine, Cable Drum Engine, designed to increase precision, speed and efficiency in subsea cable deployment.
- 4 Well Trained & Experienced Crew**
Supported by experienced and well-trained experts and crew for cable laying, this combination ensures that every operation carried out has high quality and safety standards.
- 5 Dedicated Cable Splicing Area**
Equipped with a specialized workspace, our vessel ensures precise cable splicing operations, mitigating risks and ensuring connectivity integrity.

BENTANG BAHARI

CABLE LAYING VESSEL

Discovering Bentang Bahari

Bentang Bahari Cable Laying Vessel epitomizes precision and reliability in worldwide cable installation operations. Utilizing cutting-edge DP2 technology, our vessel ensures unparalleled accuracy, even in the most challenging maritime conditions. Experience unmatched control and efficiency as we navigate the ever-evolving seascape of the global telecommunications network.

Type of Services

Cable Laying Services

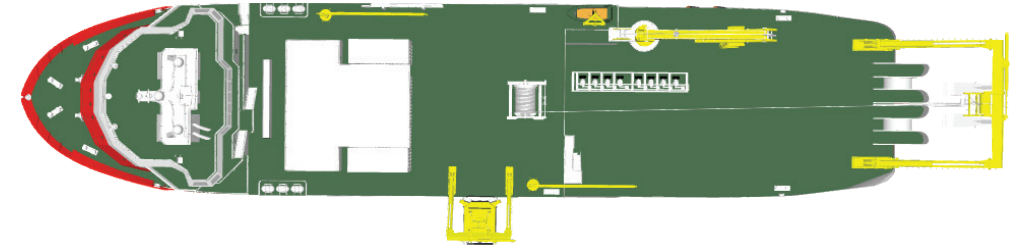

Welcome to our exceptional Cable Laying Services, where precision and expertise come together to enhance global connectivity. We use advanced technology to install submarine cables with unparalleled accuracy and efficiency. From the depths of the ocean to remote locations worldwide, our skilled crew guarantees seamless installations that support modern communication networks. With careful planning and top-notch equipment, we provide reliable solutions customized to your specific project needs.

Cable Repair Services

In the constantly changing world of underwater telecommunications, disruptions happen. But with our Cable Repair Services, you can relax knowing we're here to help. Using our expertise and advanced tools like remotely operated vehicles (ROVs), we quickly find and fix cable problems, keeping your connection strong and minimizing any downtime. Whether it's fixing cables damaged by nature or unexpected events, we're proactive and fast, ensuring your network stays reliable and giving you peace of mind. Count on us to keep your network running smoothly, no matter what challenges come your way.

Why Should You Choose Bentang Bahari?

Advanced Equipment & Technology

Equipped with our state-of-the-art ROV CT-2, capable of exploring depths **up to 3,000 meters**, we guarantee comprehensive monitoring and inspection for successful cable laying projects in any underwater terrain. Our Royal IHC Fibre Optic Cable Plough, supported by a robust 30T A-Frame, ensures precise trenching up to 3 meters deep, laying the groundwork for stable and enduring underwater infrastructure. With an impressive cable load capacity of 2,400 tonnes, Bentang Bahari stands ready to tackle even the most substantial installation projects. Trust in our vessel's capabilities to meet and exceed the demands of your endeavors, regardless of scale.

World Class Certification

We're thrilled to introduce our premier vessel, certified by Det Norske Veritas (DNV), a leader in maritime standards. This certification is more than a mark—it's proof of our dedication to excellence. Our vessel is designed to the highest standards of safety, efficiency, and environmental responsibility. With DNV Class certification, it meets stringent global benchmarks, reducing risks and enhancing reliability. This ensures our ship maintains top quality, undergoes rigorous testing, and consistently performs well in all conditions. Choosing our DNV-certified ship means choosing reliability and peace of mind. It's equipped to tackle the toughest cable-laying challenges, ensuring consistent, and high-quality performance.

Experienced & Well-Trained Crew

We're excited to showcase our cutting-edge cable-laying vessel, not just technologically advanced but also powered by a top-notch crew. Our team, expertly trained in both cable laying and marine operations, excels in managing the intricate demands of submarine cable deployment, ensuring flawless execution in any sea condition. Their combination of advanced training and extensive experience allows us to tackle technical challenges with efficiency and precision, improving operation speed and accuracy while minimizing downtime and risks. Choose our vessel services for reliable and expert cable-laying solutions. Trust our skilled crew to provide peace of mind and excellence as we help connect the world, one cable at a time.
