

Essential Traits of **Bentang Bahari**

1 Full DP Capability

Ensures stable and precise cable laying without relying on external support.

2 Internationally Certified

Certified by DNV, guaranteeing high standards of safety, quality, and performance.

3 High Technology Equipment

Equipped with cutting-edge tools like Plough, A-Frame, and Linear Cable Engine for maximum efficiency.

4 Well Trained & Experienced Crew

Operated by trained and skilled professionals to ensure high-quality and safe operations.

5 Dedicated Splicing Area

A specialized area on-board ensures accurate and secure cable splicing.

Indonesia's flagship DP2 cable laying vessel — locally designed to deliver excellence across regional and global waters.

With in-depth maritime insight, we ensure accurate route planning, smooth operations, and reliable outcomes.

Your network deserves the best. Let's connect.

Why Should You Choose **Bentang Bahari**?

Advanced Equipment & Technology

- ✓ Royal IHC – Multi-depth Fibre Optic Cable Plough
- ✓ Royal IHC – 20 T LCE, 30 T CDE, and 4 T DOHB
- ✓ AiCrane – 30T A-Frame

World Class Equipment
for Flawless Handling

World-Class Certification

- ✓ Highest global safety standards
- ✓ Operational integrity guarantee
- ✓ Environmental responsibility

DNV-certified to meet
the highest international
standards for safety and
operational excellence.

Experienced & Well-Trained Crew

- ✓ Highly experienced & well-trained
- ✓ Deep marine operation skills
- ✓ Specialized cable handling expertise

Expertly trained team
ensures smooth, fast, and
accurate cable deployment
in any sea condition.

Discovering **Bentang Bahari**

Bentang Bahari Cable Laying Vessel epitomizes precision and reliability in worldwide cable installation operations. Utilizing cutting-edge DP2 technology, our vessel ensures unparalleled accuracy, even in the most challenging maritime conditions. Experience unmatched control and efficiency as we navigate the ever-evolving seascape of the global telecommunications network.

What **We Offer**

Cable Laying Services

High-precision cable installation using advanced technology and expert crews.

Cable Repair Services

Rapid, reliable fault detection and restoration to minimize downtime.

Marine Survey

Detailed seabed mapping and route analysis for optimal cable path planning.

Post-Lay Inspection & Burial (PLIB)

Ensuring security and compliance through advanced burial and inspection techniques.
